The program is designed for the leaders of science-enabled digital gateways, sometimes referred to as “gateways.” Science gateways are used tools to provide access to many of the tools, used in cutting-edge research including data collections, visualization tools, and collaborations services, remote telescopes, seismic data tables, supercomputers, big data, and analytics services. Such gateways cater to diverse resources in a scalable way that can increase fee and installations both time and money.

Team (project) leaders are encouraged to apply. Teams should include both the project leader and the tech lead, the person attending as the leader may be the project principal investigator or the business owner or entrepreneur. Lead title is a threshold you would like to achieve, please include it as your application only application is needed per team.

APPLICATIONS MAY BE ACCEPTED THROUGH DECEMBER 15 For more information, please visit: http://www.sgcdc.org/sgcb/sgcb-page

To apply, please complete the form: https://secure.sgcdc.org/sgcb
